Majinet System Portal

About MAJINET

Majinet Smart Water Meter Systems Limited is a Kenyan company that specializes in supply installation support and maintenance of smart water meters. As the word "smart" implies, our meters are digital Internet of Things (IoT) devices and the reading is automated and done remotely via our own LORAWAN network, Safaricom NBIOT , Liquid Telecom LPWAN Sigfox network as well as other carriers available. Our ISO certified smart water meters transmit water consumption data remotely and are battery powered to last up to 16 years.

Smart Ultrasonic water metering is the latest technology in the world of water management that now automates water management and consumption data bringing about efficiency and accuracy. For years, the mechanical meter has been the natural choice. But in today's digital world where the need for communication and connectivity increases by the day, Ultra Sonic Smart metering is the future and the advantages are many. The ultrasonic meter has no moving parts, contrary to the mechanical meters that rely on a moving pendant.

Our mission

We are committed to address the unique challenges that our society are facing, including increasing customer water-consuming, water scarcity, and environment conservation. With hope, honor and our quality work, we are looking to future to make Bove one of the best brands in metering industry in the world and bringing a more Eco-Society to our planet

From experiment to global movement

Long-range telemetry technology is simple to deploy, with no technician training or network configuration necessary. Installation time is equivalent to that of standard water meters.
